DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 47-77, drawn to a method of forming copper interconnect, classified in class 438, subclass 622+.
 - II. Claims 78-87, drawn to an integrated circuit device, classified in class 257, subclass 762+..

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product invention II can be made by another and materially different process, for example: providing a temporary substrate; forming a second copper line with a slot on the temporary substrate; forming a single via isolated from other vias on the second copper line wherein the second copper line, the single via and the other vias are defined as a copper interconnect; forming an insulating layer on the second copper line and between the single via and the other vias; forming a first copper line on the insulating layer wherein the first copper line is connected to the copper interconnect; forming a substrate on the first copper line; and removing the temporary substrate (see claims 70 and 78 for details). Moreover, the method invention

,

Application/Control Number: 10/017,955

Art Unit: 2813

I can be used to make other and material different product, for example, an integrated circuit comprising a first copper line over a substrate but without an overlying second copper line in a copper interconnect (see claims 47 and 78 for details).

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanhha Pham whose telephone number is (703) 308-6172. The examiner can normally be reached on Monday-Thursday 8:00 AM 7:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Whitehead Jr., can be reached on (703) 308-4940. The fax phone numbers for the organization where this application or proceeding is assigned are (703)
